PROFESSIONAL SUMMARY

Entry-level Data Analyst (B.Tech, Computer Science, 2026) with hands-on experience across SQL, Python, Excel, and Power BI, applied through three end-to-end analytics projects covering customer retention, A/B testing, and marketing attribution. Comfortable turning raw business data into statistically sound, decision-ready insights — from feature engineering and hypothesis testing to interactive dashboards and AI-assisted analysis. Seeking a Data Analyst / Business Analyst role where I can apply SQL, data visualization, and statistical analysis to real business problems.

CORE SKILLS

SQL: MySQL, MySQL Workbench, Joins, CTEs, Subqueries, Window Functions, Views, Aggregations, CASE Statements

Python: Pandas, NumPy, Jupyter Notebook, Scikit-learn, Matplotlib, Seaborn, Plotly

Excel: Pivot Tables, Lookup Functions, IF, SUMIFS, COUNTIFS, Charts, Dashboarding, Power Query, Data Cleaning

Power BI: DAX, Interactive Dashboards, KPI Cards, Slicers, Drillthrough, Bookmarks, Tooltips, Conditional Formatting

Analytics: Data Cleaning, EDA, Data Interpretation, KPI Analysis, Trend Analysis, Segmentation, Root Cause Analysis, Reporting

Statistics / AI: Hypothesis Testing, A/B Testing, p-value, Z-test, Chi-square Test, Regression, Classification, K-Means, Generative AI, Prompt Engineering, Gemini API

EDUCATION

B.Tech, Computer Science & Engineering

2023 – 2026

Mahatma Gandhi College of Engineering & Technology, Noida — Affiliated with AKTU • CGPA: 7.95

WORK EXPERIENCE

Python Development Intern — Cognifyz Technologies

Jul 2025 – Aug 2025

- Completed a Python development internship involving practical programming assignments, structured problem-solving, and hands-on technical learning.
- Applied core Python programming concepts to assigned development challenges with a detail-oriented, solution-focused approach.
- Broke down technical assignments into manageable tasks, strengthening practical understanding of Python development workflows.
- Demonstrated clear communication, coordination, and adaptability while delivering assigned tasks on schedule.
- Certificate:** [View [Certificate](#)]

PROJECTS

Customer Retention Intelligence System

Python, MySQL, Power BI, Scikit-learn, DAX, Gemini API

- Analyzed 3,000 customers, 22,009 orders, and 1,690 support tickets using Python and MySQL to engineer customer-level retention and risk features.
- Built a Scikit-learn machine learning workflow for customer risk scoring and segmentation to flag customers needing retention attention.
- Developed an interactive Power BI dashboard with KPI cards, slicers, risk buckets, drillthrough, conditional formatting, and dynamic titles.
- Integrated the Google Gemini API for AI-assisted, customer-level retention recommendations translated into actionable business insights.

A/B Test Analysis — UrbanCart Checkout Redesign

MySQL, Python, Statistics, Power BI, DAX

- Analyzed checkout experiment data across daily performance, device, and traffic-source segments to compare Variant A vs. Variant B conversion.
- Calculated 12.67% vs. 13.73% conversion rates — a 1.06 percentage-point absolute uplift and 8.35% relative uplift — using Python and statistical analysis.
- Detected Sample Ratio Mismatch (SRM) through statistical testing, showing why the observed uplift alone was not sufficient grounds for a rollout decision.

- Built an interactive Power BI experiment dashboard with conversion KPIs, trend analysis, segment comparisons, DAX measures, and drillthrough.

Multi-Channel Marketing Attribution & CAC Analysis

MySQL, Excel, Python, Power BI

- Analyzed marketing-channel performance using spend, conversions, revenue, CAC, and ROAS to evaluate channel-level business impact.
- Implemented and compared First-Touch, Last-Touch, Linear, Time-Decay, and Position-Based attribution models to assess channel contribution.
- Built an Excel budget-allocation model (₹10 lakh) with expected conversions/revenue across Conservative, Base, and Aggressive scenarios.
- Combined SQL analysis, Excel business modeling, and Power BI visualization to support marketing performance reporting and budget planning.

CERTIFICATIONS

- Data Analyst 101 — Simplilearn SkillUp (Microsoft Content Partner), Sep 2026 (Excel fundamentals, mathematical and text functions, advanced functions, SUMIF/COUNTIF, date & time, financial functions, and data analysis) [[Certificate](#)]
- SQL and Relational Databases 101 — IBM Skills Network, Sep 2026 (SQL querying, relational database concepts, filtering, sorting, joins, aggregations) [[Certificate](#)]
- Data Analysis with Python — IBM Skills Network, Sep 2026 (data manipulation, exploratory analysis, working with datasets using Python libraries) [[Certificate](#)]
- Data Visualization with Python — IBM Skills Network, Sep 2026 (Matplotlib, Seaborn, and techniques for communicating analytical insights) [[Certificate](#)]
- EY Audit Job Simulation — Forage, Aug 2026 (business understanding, sustainability reporting, risk assessment, control/substantive testing) [[Certificate](#)]
